

Why Orlando Health?

I came to Orlando Health because I was extremely impressed with the confidence and overall happiness of the residents. I was also extremely impressed with Sal and his dedication to the program and residents.

~ Ian Backstrom, MD Class of 2015

The people and sense of camaraderie. I rotated through Orlando Health as a student and the faculty, residents and staff all helped to create a feeling of family.

~ Carolina Pereira, MD Class of 2015

During the interview, the residents in the program at ORMC just seemed happier than most places. They got along, they worked hard, but they also played hard when they weren't working. It was obvious they weren't just co-workers, they were friends. That was important to me.

~ Rebecca Wessinger, MD Class of 2015

When I came to interview, I really enjoyed the residents and staff that I had the opportunity to meet. I realized that the program would offer great training, and a great environment to call home for three years.

~ Tory Weatherford, MD Class of 2016

There is no other residency program like Orlando Health. It provides great teaching in a large community-type setting while engaging in multiple research projects as an academic institution. A well-established program, the teaching here is one of the best that I have ever experienced and there is an even balance of autonomy and supervision.

~ Philip Lin, MD Class of 2016

A very strong academic/clinical experience but more importantly the people. Incredible faculty/staff and a very welcoming and tight group of residents.

~ Chris Tann, MD Class of 2016

Family atmosphere, strong academics with a community feel, great opportunity for any of the fellowship opportunities.

~ Blaine Norton, MD Class of 2017

Although I am from the Midwest originally, I have heard countless great things about Orlando Health and the strength of the residency program and fantastic teaching and support of the faculty. When I interviewed here I was blown away by the faculty, the support staff, and what the program has to offer us as residents. Orlando Health also has the best ultrasound training for residents over any other program I interviewed at. Orlando is also a really fun city. There is always something going on. There are so many lakes and the ocean here to support my fishing addiction and love for watersports when I am not working!

~ Ryan Queen, MD Class of 2017

There is a strong team dynamic between the residents, and the faculty are very supportive. Also, with Orlando being a huge tourist destination there is lots of pathology and trauma cases to see.

~ Ivan Samcam, MD Class of 2017
