Team Goal Setting

The secret of getting ahead is
getting started

-Mark Twain

- 77% of Patients Achieve Their Goals they set with the team.
- Maximum Independence is the Goal to return home.
- Higher * FIM™ scores mean more independence for the person.
 - All Patients 96.5
 - Stroke 86.3
 - Traumatic Brain Injury 92.4
 - Spinal Cord Injury 92.8
 - Orthopedic Injury 105.1
 - Major Multiple Trauma 102.2

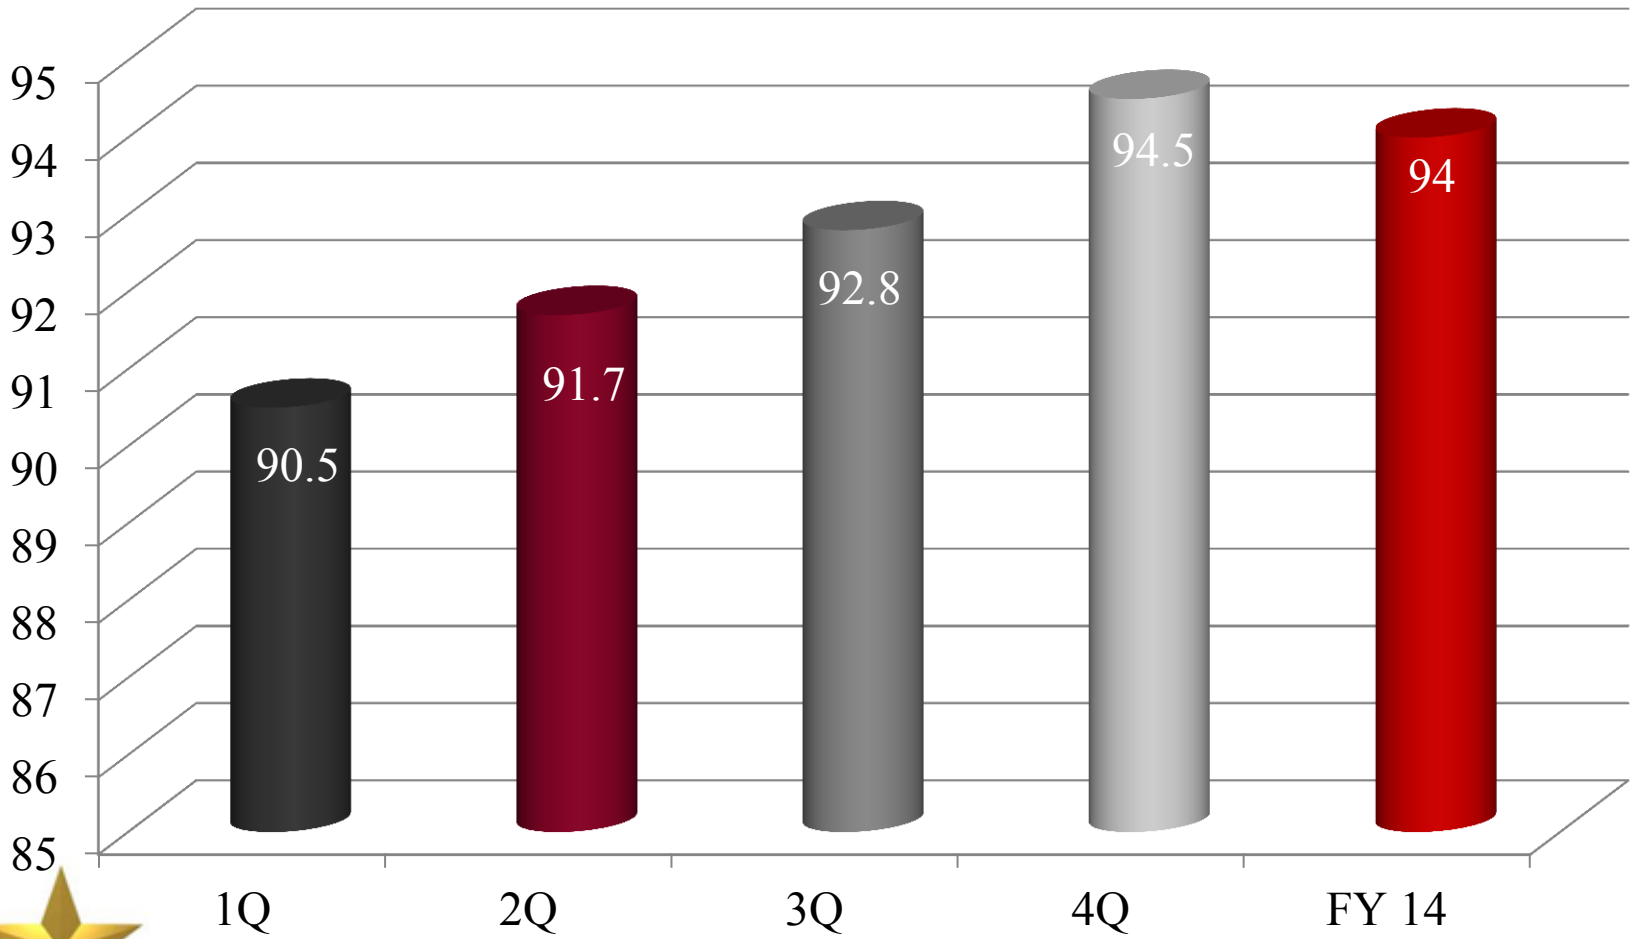

*Functional Independence Measure™

83% of OHRI Patients go home after completing the program

- On Average 10% of people go back to the hospital from rehab for medical care.
- Twenty–one % of these patients have completed the program and go home from the hospital.
- More than 50% of these patients return to OHRI to complete the program before going home.
