

Orlando Health PGY-2 Pediatric Pharmacy Residency

The PGY-2 Pediatric Pharmacy Residency is a one-year, post-graduate training program designed to develop essential knowledge and skills for contemporary health-system pharmacy practice. The residency program provides flexibility to adapt to the resident's specific learning needs and goals. Training is provided through rotational experience and longitudinal activities.

Graduates of the Orlando Health PGY-2 Pediatric Pharmacy Residency will be competent and confident practitioners of pharmaceutical care in multiple pediatric patient care environments, assuring safe, effective and appropriate drug therapy.

The majority of the clinical rotations will be conducted at Arnold Palmer Medical Center (APMC) which includes both Arnold Palmer Hospital for Children (APH) and Winnie Palmer Hospital for Women & Babies (WPH).

PGY2 Program Purpose

PGY2 pharmacy residency programs build on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification, if available.

Goals of the Residency

Graduating PGY-2 Pediatric Pharmacy Residents will:

1. Assure safe, effective, appropriate drug therapy and prevent, identify, and resolve drug related problems.
2. Present as a competent, confident, and compassionate practitioner and set and reassess goals.
3. Demonstrate a commitment to the advancement of the profession and continued personal growth.
4. Possess comprehensive health-system pharmacy skills that promote future professional growth.
5. Create, promote, and participate as a part of a multidisciplinary healthcare team.
6. Demonstrate the ability to identify opportunities for improvement within a practice and practice site.
7. Provide education to professional and non-professional audiences, utilizing effective communication skills.
8. Demonstrate a foundation of leadership skills in pharmacy practice.

Residency Program Director

Susan Norman, Pharm.D., BCPS, BCPPS

Director, PGY-2 Pediatric Pharmacy Residency

Assistant Manager, Clinical Pharmacy Services

Education: Pharm.D., University of Florida, Gainesville, FL (2010)

Training: PGY-1 Pharmacy Residency (2010-2011) & PGY-2 Pediatric Pharmacy Residency (2011-2012), Orlando Health, Orlando, FL

Interest Areas: pediatric critical care, trauma, infectious diseases
