

WHERE SHOULD YOU TAKE YOUR CHILD?

PRIMARY CARE PEDIATRICIAN

Your primary care doctor should be your first stop for most healthcare and is the best place to go for non-emergency care.

- Wellness or preventive medicine visits and sports physicals
- Chronic condition management
- Vaccinations
- All childhood illnesses
- Asthma
- Abdominal pain
- Burns / cuts
- Cold/ear ache/sore throat
- Flu symptoms (sudden fever, cough, congestion, body aches)
- Fractures and sprains
- Fever
- Minor injuries
- Rashes and hives
- Vomiting or diarrhea
- Coordination with specialists

URGENT CARE

Use urgent care if your primary care doctor is unavailable and if you cannot or should not wait.

- Abdominal pain
- Burns
- Cuts that require stitches
- Flu symptoms (sudden fever, cough, congestion, body aches)
- Fractures and sprains
- High fever
- Minor injuries
- Rashes and hives
- Vomiting or diarrhea

EMERGENCY ROOM

Emergency rooms are designed to handle life- or limb-threatening conditions.

- Broken or dislocated bones
- Deep cuts or burns
- Loss of consciousness
- Seizures
- Serious allergic reactions
- Severe trouble breathing
- Trauma injuries

These lists are not all-inclusive. Always rely on your best judgment to determine if your child needs emergency care.
